Dear Josh and Esther,

Thank you very much for your letter of July 14th. I was very interested to hear of your plans in Europe and also to hear of your decision to move to Stanford. From all that I hear Stanford is undergoing big changes and is gathering together a first class group of workers.

I have changed my time of departure from the States and will now be leaving a week later, that is I shall be leaving San Francisco by air for Australia on September 13th. I expect to be in San Francisco from about the 5th or 6th at the latest and would very much like to see you either in San Francisco or Palo Alto. Could you let me know where would be the best place? You could contact me in San Francisco through Dr. Adelberg to whom I have written and whom I will be seeing. You might possibly find it more convenient to write to me c/- Conference at Montreal. However, I leave this to you and look forward to hearing from you as to the exact place and date where we can meet. I shall now definitely go to Madison and I hope to arrange some other visits once I get to the U.S.

The linkage tests on Pseudomonas seem to fit exactly with the Coli pattern, everything is explained beautifully if one assumes the existence of an E locus.

With my best wishes,

All the best

Bruce
